

**Climate Impact Company Medium/Extended Range Forecast/Commentary**

**Issued: Monday, September 18, 2017**

**Medium-range 6-10 Day Forecast Valid September 23-27, 2017 (yesterday's forecast left)**

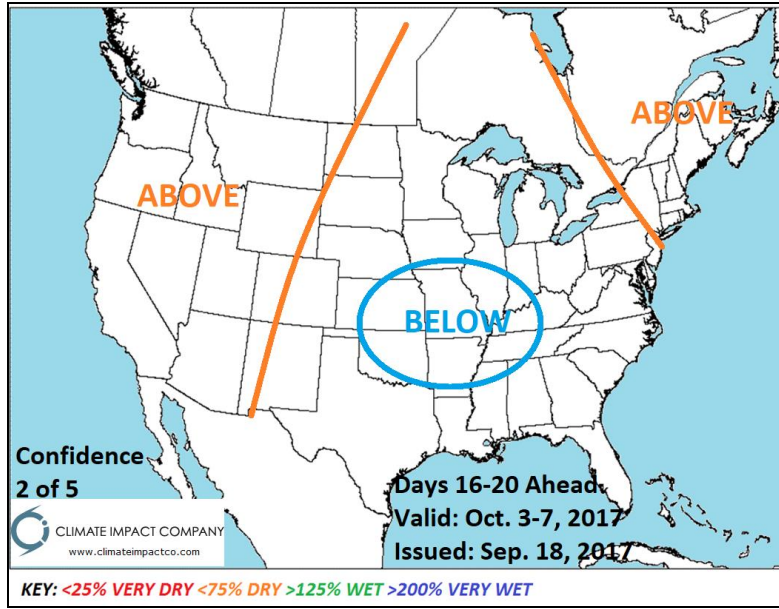

**Medium-range 11-15 Day Forecast Valid Sep. 28-Oct. 2, 2017 (yesterday's forecast left)**

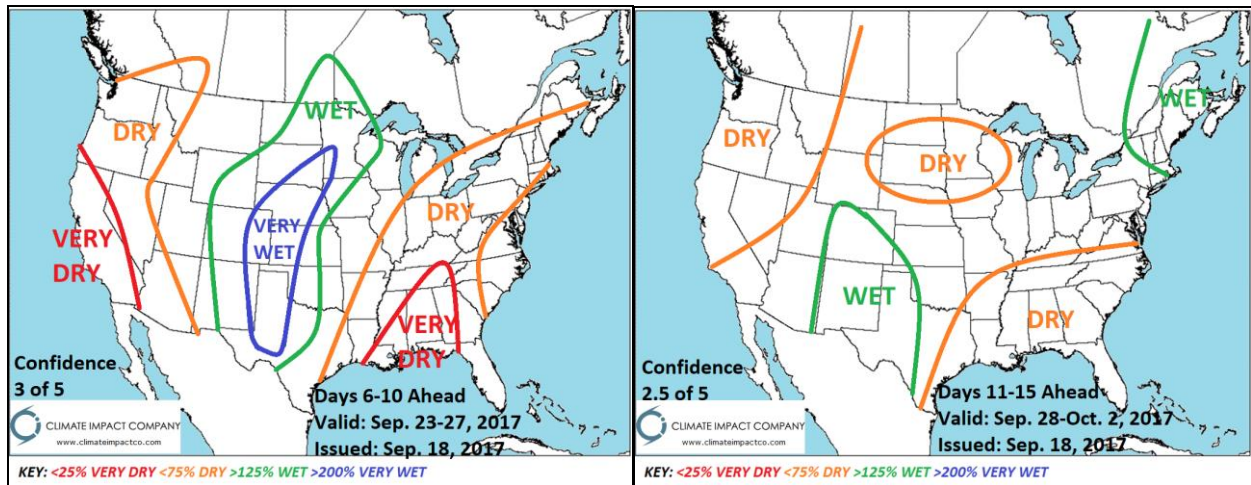

**Medium-range commentary:** Strong warming in the East remains in the 6-10 day forecast while the big chill lingers West. In the 11-15 day period cool weather shifts to the South-Central U.S. while warmth lingers East and regenerates in the West.

**Extended-range 16-20 Day Forecast Valid October 3-7, 2017**

**Extended-range commentary:** Cool Mid-South while western warmth broadens.

**U.S. Medium-range Precipitation Forecast**

**Comment:** Wet weather in the Northwest this week shifts to the Great Plains in the 6-10 day period. In the 11-15 day period wet weather is less excessive shifting to western Texas and New England.
